

Another Beverton–Holt with exponent:
 $y = y_0 / (1 + (a * x)^b)$

Another linear:
 $y = 1 + y_0 * (1 - a * x)$

Beverton–Holt:
 $y = y_0 / (1 + a * x)$

$$y = y_0 / (1 + a * x)^b$$

Exponential/log:
 $y = y_0 * \exp(a * \log(x + 1))$

Exponential:
 $y = y_0 * \exp(a * x)$

Linear:
 $y = y_0 - a * x$

Non-linear isoclines:
 $y = y_0 / (1 + x^a)$
